RE: Single Accidental Leakage Source Determination

Dear Ms. Fore:

This letter is in response to your July 30, 2010 filing requesting FERC staff concurrence on the accidental leakage source scenarios to be used in demonstrating compliance with Title 49, Code of Federal Regulations, Part 193.

As indicated by the March 25, 2010 interpretation which you provided as Attachment 1, the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration (PHMSA) has stated that the siting requirements of Part 193 Subpart B apply to the proposed project in the above docket and has required Weaver's Cove Energy, LLC to develop and submit an alternative exclusion zone model to the PHMSA Administrator for approval.

The PHMSA also acknowledged the need for further guidance on the design-spill criteria that should be used in developing that alternative model and indicated that such guidance was currently under technical review by that agency. As a result, we are forwarding your request to the PHMSA for proper consideration in their ongoing technical review.

Sincerely,

Terry L. Turpin, Chief
LNG Engineering Branch
